

GlobaLex: A Unique and Valuable Tool for Foreign, Comparative, and International Law Research

HEIDI FROSTESTAD KUEHL*

I. Introduction

How do I find Romanian statutes and cases in English? How might I better understand treaty research and use of *travaux préparatoires*, find available online and print resources for international agreements, and obtain a cogent overview of this topic? What sources might be helpful for researching religious legal systems, such as Hindu, Buddhist, or Islamic law? Where can I find a description of the legal system of Belarus? As U.S. law schools are becoming increasingly global in their scope and preparation of students and LLM programs abound, law librarians will more frequently encounter foreign, comparative, and international law reference questions like the above.¹ In addition, if a reference librarian does not have a background or exposure to foreign, comparative, and international research or if there isn't a foreign and international law librarian at the institution, reliance on available online

reference sources, such as research guides, and traditional reference works in foreign and international law will be essential.² One excellent online resource that provides research guidance in the areas of foreign, comparative, and international law and has an authoritative and fascinating portal of research articles is *GlobaLex*.³

II. The Inception of GlobaLex

Nearly two years ago, the vision for GlobaLex came to fruition and received the approval and generous support from the Hauser Global Law School Program by Prof. Joseph Weiler⁴ and Dean Richard Revesz of the New York University School of Law⁵. The idea of *GlobaLex* as an “electronic publication dedicated to international and foreign law research”⁶ was spearheaded by Mirela Roznovschi, Foreign and International Law Reference Librarian at New York University School of Law, who is also editor for the project. One of the goals for founding *GlobaLex* was to continue to enhance international and foreign legal scholarship worldwide by

providing resources and research guides to support this specialized area.⁷ *GlobaLex* is divided into three categories for conducting research: 1) International Law Research; 2) Comparative Law Research; and 3) Foreign Law Research.⁸ A new section, "Tools for Building Foreign Comparative and International Law Collections," will be added in March 2007.⁹ Each section contains articles written by legal specialists, including lawyers, law librarians, LLM candidates, and foreign officials.¹⁰ By April 2007, there will be approximately 110 jurisdictions represented in *GlobaLex* and more topics in comparative law will also be added throughout the next year. The editor's goal is to eventually cover all of the jurisdictions in the world in order to provide this unparalleled access to information about foreign legal systems, international legal research, and comparative legal research.¹¹ Hot topics in International and Foreign legal research, such as the recent *Research Guide on TRIPS and Compulsory Licensing and Transnational and Comparative Family Law: Harmonization and Implementation*¹², are especially valuable for

Garavaglia (University of Michigan Law Library) on collection development policies and building a foreign, comparative, and international law collection and Dennis Kim-Prieto (Rutgers School of Law Library) on databases for Spanish-speaking jurisdictions.

¹⁰ Note also that many of the foreign law guides had to be translated by authors or translators from those countries into English from the foreign language before being published in *GlobaLex* (e.g., *Guide to Doing Research in Brazil*).

beginning researchers who are grappling with these difficult research issues and where to find the law.

GlobaLex is not just narratives about legal systems and topics with a list of resources; it also represents a powerful forum for freely describing sources of law for particular countries, which might not be information that is freely accessible in certain jurisdictions of the world.¹³ All of the guides attempt to provide a comprehensive mix of both print and electronic resources for research in international, foreign, and comparative law.¹⁴ As such, they are invaluable for organizing all of the available resources for these often complicated topics and jurisdictions of international and foreign legal research. Amazingly, the website is also available for free through the Hauser Global Legal Studies website.¹⁵ For current awareness, the website also provides a “Go Global” e-mail service to receive notification of new Working Papers, Book Reviews, and *GlobaLex* articles most recently published.¹⁶

III. International Law Research

Getting started with research in an area of international law is often a daunting task for the researcher, especially if it is an unfamiliar topic. For that reason, traditional print and online research guides are essential to help guide research toward particularly relevant primary and secondary legal resources. Using *GlobaLex*, researchers are able to access some of the

This might be considered a great sacrifice by authors in those nations because of the current state of the governments. Interview with Mirela Roznovschi on March 5, 2007.

premier topics in international legal research. For example, the website includes traditional topics in international law, such as the essential *Introduction to Sources for Treaty Research* and a guide to researching the United Nations¹⁷, but it also includes more specialized topics like *Regional Trade Agreements in Africa: A Historical and Bibliographic Account of ECOWAS and CEMAC* and a *Research Guide on TRIPS and Compulsory Licensing*.¹⁸ GlobaLex also has comprehensive guides to the Council of Europe's documentation and the European Union's legal materials for the inexperienced researcher in these areas.¹⁹ Not only do the research guides provide a wonderful overview to these traditional institutions, they also clearly organize print and electronic sources of law, such as the treaties, legislation, and case law of the European Union.²⁰

Finally, the international law portion of GlobaLex contains an indispensable guide to researching the drafting histories of international agreements (or *travaux préparatoires*) written by Jonathan Pratter, which provides a detailed approach for uncovering these hard to find materials in the negotiating histories of international agreements and lists available resources with examples for researchers.²¹ Of course, the website will continue to

expand to include more topics in international law to help researchers, reference librarians, and those other scholars who rely on comprehensive research guides in unfamiliar areas of the law for their scholarship and location of reliable resources.²²

IV. Foreign Law Research

In the foreign law research portion of the GlobaLex website, the editor has expanded the scope of the project to include research guides for over 110 jurisdictions of the world as of April 2007.²³ This phenomenal effort is unparalleled in its currency and vital guides to online and print resources for foreign legal research. For novice researchers who are approaching a foreign jurisdiction for the first time, the GlobaLex articles provide an overview of the country's legal system, branches of government and sources of primary law, governmental institutions, helpful secondary sources, and websites of the foreign law faculties.²⁴ Because the guides are often written by expert librarians or lawyers in those jurisdictions, they provide a unique and authoritative perspective of the primary and secondary sources of law.²⁵

²² Research guides currently presented in the "International Law Research" section of *GlobaLex* include the following topics: APEC, ASEAN, Council of Europe, ECOWAS and CEMAC, European Union, International Commercial Law, International Criminal Law, International Environmental Law, International Health Law, International Marine Environmental Law, International Sports Law, International Trade, International Treaties, NAFTA and CAFTA, Sustainable Development Law, Terrorism, TRIPS, and the United Nations. Many of the articles give fascinating overviews of the history of the governments and legal systems with links to online English-language resources for further exploration.²⁶ For example, the governments of Belarus and the Kyrgyz Republic are intricately described with interesting examples of their newer governmental structures and available resources in English.²⁷ Some of the research guides clearly emphasize the location of online resources in English for the particular jurisdiction, such as those websites identified in *French Law on the Internet: The Basics and Free Resources*, *Material on Russian Federation Law in English: Selection of Sources*, and *Japanese Law via the Internet*.²⁸

Many of the guides also include references to topical resources for particular subjects of research in foreign and comparative law like the guide to German business and commercial laws, which can be extremely helpful for a researcher who is comparing a particular subject and correlating laws among

Perhaps it is understated how valuable it is to have citation to online and print resources available in English, which is often one of the main challenges of foreign law research.

jurisdictions of the world.²⁹ Currently, GlobaLex also provides an excellent inclusion of many African, South American, and Central American jurisdictions for which it is often hard to locate thorough descriptions, explanations, and links to primary law in English.³⁰ It is exciting to think that GlobaLex will strive to include articles for almost all foreign jurisdictions of the world in the future.³¹ Overall, the effort to provide guidance to the online and print legal resources and overviews of the legal systems of countries of the world in a single portal is essential for researchers when confronting a foreign legal research issue and an especially helpful tool for law librarians when helping them with their research.

V. Comparative Law Research

Through GlobaLex's comparative law portal, researchers are able to access a variety of articles that guide and organize available online and print resources for the specialty legal topics of comparative law. For example, for complicated research inquiries about religious legal systems, researchers can rely upon the excellent sources found in Marilyn Johnson Raisch's *Religious Legal Systems: A Brief Guide to Research and Its Role in Comparative Law*.³² Within each comparative law article, the authors provide overviews of the areas of comparative law, descriptive secondary sources such as essential books and articles, and primary legal resources for each jurisdiction.³³

²⁹ See Martina Kammer and Anne Scharrenberg, *German Business and Commercial Laws: Guide to Translations into English and Select Auxiliary Sources*, available at http://www.nyulawglobal.org/globalex/Germany_Business.htm (last visited March 5, 2007). See also topical areas within foreign law guides, e.g., topical civil codes in jurisdictions like Brazil or the formal laws on certain topics in Sudanese legal research.

See also Andrew Grossman, *Finding the Law: The Micro-States and Small Jurisdictions of Europe*, available at <http://www.nyulawglobal.org/globalex/Microstates.htm> (last visited March 7, 2007).

For beginning foreign and comparative law research, there are also extremely helpful introductory guides to foreign legal research by Mary Rumsey of the University of Minnesota and comparative law research by Paul Norman of the University of London's Institute of Advanced Legal Studies.³⁴ These articles can help de-mystify the research process by identifying available traditional sources for beginning research and relevant secondary and primary resources in print and online for the researcher.³⁵ For more complex comparative law research, GlobaLex also provides articles written by specialists for current hot topics like Immigration Law, Transnational and Comparative Family Law, and Religious Legal Systems.³⁶ For example, for immigration law, an exhaustive comparative guide to the laws of Australia, Canada, and the United States is given, which would be extremely vital to an immigration lawyer in any of those jurisdictions given the transnational nature of today's practice.³⁷ Because of the wealth of descriptive materials and resources for both the novice and the experienced practitioner, the comparative law portal of GlobaLex is extremely effective for assisting with research and scholarship in this often difficult research area.

VI. Conclusions

GlobaLex provides a single portal of comprehensive research articles for the future of legal scholarship in the areas of international, foreign, and comparative law, which will continue to expand to meet the needs of the growing community of international lawyers, scholars, and law librarians.

³⁴ See Mary Rumsey, *Basic Guide to Researching Foreign Law*, available at http://www.nyulawglobal.org/globalex/Foreign_Law_Research.htm (last visited March 7, 2007) and Paul Norman, *Comparative Law*, available at http://www.nyulawglobal.org/globalex/Comparative_Law.htm (last visited March 7, 2007).

³⁵ These articles are also quite helpful for law librarians who are guiding the researcher's location of pertinent materials during a reference interview.

Because of its breadth for these critical areas of legal research, law librarians will continue to rely upon the guides as essential tools for reference interviews with patrons and for instruction in law schools. In addition, GlobaLex can be helpful for student research in Advanced Legal Research courses, law school seminars in foreign and international legal topics, and for research preparation and guidance in an increasingly global practice. Many law libraries already link to GlobaLex articles on their websites to guide students and faculty members to the valuable research guides for foreign and international legal research. Law librarians who specialize in foreign and international law or who have a passion for these areas of the law also have an opportunity to teach the available resources cited in GlobaLex and can provide much needed guidance by referring to these authoritative articles. As for the future of GlobaLex, it will continue to expand and provide resources for myriad foreign jurisdictions and areas of international law, which will be an invaluable service for the legal community because of the frequent use of its recommended sources and valuable descriptions for areas of international, foreign, and comparative law.
